

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A non-refillable dispenser adapted for dispensing from a table top and convertible to dispensing from a conventional rolled product fixture, the non-refillable dispenser comprising:

a housing formed to include a compartment to hold sheets therein and a dispensing opening for removal of sheets from the housing, the housing designed to be positioned on a table top for dispensing sheets therefrom, the housing including connecting means formed in the housing including two spaced-apart areas of perforations which, when opened, provide a pair of spaced-apart openings which permit the housing to be coupled to a fixture, the connecting means masked as a portion of the housing when the dispenser is positioned on a table top for dispensing, the connecting means easily un-masked when the perforations are opened to provide the pair of spaced-apart openings to permit the housing to be releasably coupled to a fixture[[.]], and wherein at least one wall of the housing is disposed at an oblique angle relative to a vertical support surface when coupled to a fixture.

2. (Currently Amended) The non-refillable dispenser of claim 1, wherein the housing is constructed from a material which includes [[a]] paperboard.

3. (Currently Amended) The non-refillable dispenser of claim 1, wherein the housing is constructed from a material which includes [[a]] polymer film.

Claims 4, 5 and 6: Canceled.

7. (Previously presented) The non-refillable dispenser of claim 1, wherein each area of perforations is disposed a location selected from the group consisting of an end and a wall of the housing.
8. (Original) The non-refillable dispenser of claim 1, wherein the sheets include dry sheets.
9. (Original) The non-refillable dispenser of claim 1, wherein the dry sheets are toilet tissue.
10. (Currently amended) The non-refillable dispenser of claim 1, wherein the compartment includes ~~sheets include~~ dry sheets and a container of premoistened sheets.
11. (Original) The non-refillable dispenser of claim 1, wherein the housing includes a resealable cover.
12. (Currently amended) The non-refillable dispenser of claim 1, wherein the housing is constructed from a material which includes [[a]] cellophane.

13. (Currently amended) A non-refillable dispenser adapted for dispensing from a table top and convertible to dispensing from a conventional rolled product fixture, the non-refillable dispenser comprising:

a housing formed to include a compartment to hold sheets therein and a dispensing opening for removal of sheets from the housing, the housing designed to be positioned on a table top for dispensing sheets therefrom, the housing including two spaced-apart areas of perforations formed in the housing which, when opened, provide a pair of spaced-apart openings which permit the housing to be coupled to a fixture, the purpose for the perforations masked when the dispenser is positioned on a table top for dispensing, the purpose for the perforations unmasked when the perforations are opened to provide the pair of spaced-apart openings and the housing is releasably coupled to a fixture in a bathroom[[.]], and wherein at least one wall of the housing is disposed at an oblique angle relative to a vertical support surface when coupled to a fixture.

14. (Currently amended) The non-refillable dispenser of claim 13, wherein the housing is constructed from a material which includes [[a]] paperboard.

15. (Currently amended) The non-refillable dispenser of claim 13, wherein the wherein the housing is constructed from a material which includes [[a]] polymer film.

Claims 16, 17 and 18: Canceled.

19. (Previously presented) The non-refillable dispenser of claim 13, wherein each area of perforations is disposed a location selected from the group consisting of an end and a wall of the housing.

20. (Original) The non-refillable dispenser of claim 13, wherein the sheets include dry sheets.
21. (Original) The non-refillable dispenser of claim 13, wherein the dry sheets are toilet tissue.
22. (Currently amended) The non-refillable dispenser of claim 13, wherein the compartment includes ~~sheets include~~ dry sheets and a container of premoistened sheets.
23. (Original) The non-refillable dispenser of claim 13, wherein the housing includes a resealable cover.
24. (Currently amended) The non-refillable dispenser of claim 13, wherein the housing is constructed from a material which includes ~~[[a]]~~ cellophane.

25. (Currently amended) A non-refillable dispenser adapted for dispensing from a table top and convertible to dispensing from a conventional rolled product fixture in a bathroom, the non-refillable dispenser comprising:

a housing formed to include a compartment to hold dry sheets and a container of premoistened sheets, and dispensing openings positioned in the housing to permit each of the dry sheets and the premoistened sheets to be dispensed from the housing, the housing designed to be positioned on a table top for dispensing sheets therefrom, the housing including two spaced-apart areas of perforations formed in the housing which, when opened, provide a pair of spaced-apart openings which permit the housing to be coupled to a fixture, the purpose for the perforations masked when the dispenser is positioned on a table top for dispensing, the purpose for the perforations unmasked when the perforations are opened to provide the pair of spaced-apart openings and the housing is releasably coupled to a fixture in a bathroom for dispensing sheets therefrom[[.]], and wherein at least one wall of the housing is disposed at an oblique angle relative to a vertical support surface when coupled to a fixture.

26. (Currently amended) The non-refillable dispenser of claim 25, wherein the housing is constructed from a material which includes [[a]] paperboard.

27. (Currently amended) The non-refillable dispenser of claim 25, wherein the wherein the housing is constructed from a material which includes [[a]] polymer film.

Claims 28, 29 and 30: Canceled.

31. (Previously presented) The non-refillable dispenser of claim 25, wherein each area of perforations is disposed a location selected from the group consisting of an end and a wall of the housing.

32. (Previously presented) The non-refillable dispenser of claim 25, wherein the housing includes a resealable cover.

33. (Currently amended) The non-refillable dispenser of claim 25, wherein the housing is constructed from a material which includes [[a]] cellophane.

Claim 34: (Previously canceled).

35. (New) A non-refillable dispenser adapted for dispensing from a table top and convertible to dispensing from a conventional rolled product fixture, the non-refillable dispenser comprising:

a housing formed to include a compartment to hold sheets therein and a dispensing opening for removal of sheets from the housing, the housing designed to be positioned on a table top for dispensing sheets therefrom, the housing comprising an excess of material on one portion of the housing, the excess of material folded against an outer surface of the housing when the dispenser is positioned on a table top, the excess of material releasable such that it forms a tent-shaped configuration having two opposing generally triangular sides, and wherein each triangular side includes one area of perforations which, when opened, provide a pair of spaced-apart openings which permit the housing to be coupled to a fixture, the purpose for the perforations masked when the dispenser is positioned on a table top for dispensing and the excess of material is folded against the outer surface of the housing, the purpose for the perforations unmasked when the excess of material is released and the perforations are opened to provide the pair of spaced-apart openings for releasably coupling the housing to a fixture in a bathroom to dispense sheets therefrom.

36. (New) The non-refillable dispenser of claim 35, wherein at least one wall of the housing is positioned substantially parallel to a vertical support surface when coupled to a fixture.

37. (New) A non-refillable dispenser adapted for dispensing from a table top and convertible to dispensing from a conventional rolled product fixture in a bathroom, the non-refillable dispenser comprising:

a housing formed to include a compartment to hold dry sheets and a container of premoistened sheets, and dispensing openings positioned in the housing to permit each of the dry sheets and the premoistened sheets to be dispensed from the housing, the housing comprising an excess of material on one portion of the housing, the excess of material folded against an outer surface of the housing when the dispenser is positioned on a table top, the excess of material releasable such that it forms a tent-shaped configuration having two opposing generally triangular sides, and wherein each triangular side includes one area of perforations which, when opened, provide a pair of spaced-apart openings which permit the housing to be coupled to a fixture, the purpose for the perforations masked when the dispenser is positioned on a table top for dispensing and the excess of material is folded against the outer surface of the housing, the purpose for the perforations unmasked when the excess of material is released and the perforations are opened to provide the pair of spaced-apart openings for releasably coupling the housing to a fixture in a bathroom to dispense sheets therefrom.

38. (New) The non-refillable dispenser of claim 37, wherein at least one wall of the housing is positioned substantially parallel to a vertical support surface when coupled to a fixture.
